

Mardon's history is rooted in a passion for precision machining. Donald Fox, the President and CEO who opened Mardon in 1981, is a man who sees value in utilizing prismatic machining as a means of creativity. The unwavering commitment to success that Don has rooted in Mardon's foundational values continues on as his daughter, Stacy Fox has taken the helm. Mardon's team prides themselves in their dedication, quality and precision.

## DIFFERENTIATORS

The reputation of precision and reliability is what makes Mardon stand apart from other shops. We are a small business with high output and we pride ourselves in our diverse staff, ingenuity, and attention to detail. The goal is to master our specific field with striking accuracy in this ever-changing world, while also creating a transparent and collaborative relationship with our customers, and taking care of our employees. We consistently look to the future without forgetting the past.

With a heavy focus on CNC mills and assembly work, Mardon primarily provides medical components to multiple long-term and valued customers, while also remaining eager to offer its services to new customers in a variety of industries.
